Telephone Number: +886-2-8601-3839

Website: www.yomura.com.tw

Primary Contact: Jen-Kuan Ting

Email Address: kuan_ting@yomura.com.tw

DG

Purpose

Licensee would like to use certain Apple technology (the "Licensed Technology") in Licensee products and sell such products to Licensee's end-user customers, directly or indirectly through resellers and distributors. Licensee would also like to use the Licensed Technology in Licensee products for sale or distribution under the label or brand of a third party. Licensee would additionally like to use Apple's proprietary graphic designs (the "Logos") in connection with Licensee's products. Apple is willing to grant Licensee a limited license to use the Licensed Technology in certain Licensee products (the "Licensed Products") and to use the Logos in connection with such Licensed Products on the terms and conditions set forth in this Use License. This is a license agreement only and not an agreement for the sale of goods.

Agreement

1. Definitions

Capitalized terms used in this Use License are defined in Schedule A.

2. Licensed Products

Product Proposal

Licensee must provide Apple, for Apple's approval, a non-confidential Product Plan for each Proposed Product. A completed Product Plan must be submitted through the MFi web-based portal or other submission mechanism or process specified by Apple.

Apple may provide feedback regarding the category fit of any Proposed Product and approve or disapprove any Proposed Product, for any reason, in Apple's sole discretion. If Apple approves a Proposed Product, Apple will confirm to Licensee, via the MFi web-based portal, or email, that the Product Plan has been approved. Licensee may not purchase or use Licensed Components for a Proposed Product unless and until Apple approves the Product Plan for that Proposed Product.

Certification

Unless otherwise specified, Licensee must certify that each Proposed Product is compatible with all Compatible iOS Products by passing the certification tests specified by Apple and submitting the Certification Test Materials at two points during development: (a) when the first prototype is created; and (b) when the prototype is Production Ready, but in no event less than 30 days before beginning commercial production, offering for sale, selling or otherwise distributing the Proposed Product. Apple's certification tests may differ depending on the features, functionality and capabilities of the Proposed Product.

Apple may require, among other things, that Licensee submit certain Certification Test Materials to an Apple-approved independent third-party test facility. If it does so, Apple will provide Licensee a list of approved third-party test facilities, and Licensee is solely responsible for confirming that they are in receipt of the then-most-current version of such list and are submitting Certification Test Materials to only a currently approved facility. Apple may
